SERVICES / TREATMENTS / FACILITIES

Private and NHS Dental Treatment (All age ranges)

Private Direct Access Dental treatment (All age ranges)

Our 4 dentists, 1 hygienist and therapist are supported by a team of nurses led by our senior dental nurse. Administrative support is provided by our receptionist and practice manager. Should any patients require any treatment that requires specialist input or treatment that we can not offer we can, with the patient's consent, refer these patients to other clinicians.

All general dental services are provided as well as tooth whitening, non surgical facial aesthetics and cosmetic orthodontic treatment (Invisalign Go). There are 3 dental surgeries each equipped with a dental chair which is equipped with air turbine and contra angle handpieces, ultrasonic scalers and 3 in 1 air/water syringe, as well as narrow and large bore aspiration. The practice also enjoys the benefit of an intra oral scanner. Each surgery is also equipped with intra oral X ray units, and radiographs are developed digitally. In line with IRMER the following can operate the X ray units: Aled Clement, Matthew Harris, Nia Thomas, Elaine Rees, Alison Douch Ceri Wills-Wood. The following can operate the X ray units under supervision: Nicola Evans, Susan Williams, Katrin Morris, Jamie-Lee Daniels, Zoe Prosser, Amy Joshua and Sara Richards. The surgery also has 2 stand alone rotary/reciprocating endodontic motor, which can be used in any of the 3 surgeries.

There is a dedicated decontamination room to allow reusable instruments to be reprocessed. Instruments are manually cleaned in conjunction with an ultrasonic bath prior to being sterilised in one of two autoclaves, following guidelines issued in WHTM 01-05. There is also an automatic handpiece oiler to maintain and aid in decontamination of the dental handpieces. There are a sufficient number of reusable instruments available to allow the smooth running of our services taking into account the period of time necessary to decontaminate these instruments after use.

Two of our surgeries are on the ground floor, one is upstairs. Should any person be unable to climb the stairs to see their clinician we are able to arrange for that patient to be seen in a downstairs surgery by their clinician.
